## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. Statement

Novelty (N)	Claims	1-6	YES
	Claims		NO
Inventive step (IS)	Claims	1-6	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-6	YES
	Claims		NO

### 2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1: JP 06-348234 A

D2: JP 11-143435 A

The present invention relates to a liquid crystal display for improving the uniformity of image quality of pixels in the rows having reversed polarity.

D1 discloses that erasing pulses of monopolarity are impressed to reset all the pixels on the selected scanning electrodes to the dark in the erasing period. The difference to the claimed invention is that in D1, all the pixels on the selected scanning electrodes are changed to the bright or the dark according to the display data, to display video signals in the writing period.

In Claims 1 of the present invention, the data driver biases the data lines to a voltage with a predetermined level before outputting the gray voltages to the pixels in each scanned row. However, the difference is that in the claimed invention, the data driver reverses the polarity of the gray voltages to be applied to the data lines of the liquid crystal panel by a predetermined number of rows.

Therefore, the invention, as in Claims 1-6, is considered to be novel and to involve an inventive step.

The invention, as in Claims 1-6, is also considered to be industrially applicable.
